

WHAT IS A HEALTHCARE INSTITUTION PARTNERSHIP?

Employees working in healthcare seek access to the latest medical technology, the opportunity to connect with international experts and collaborate on exciting projects and studies. Through a partnership with the Holomedicine® Association, Healthcare Institutions are able to offer this to their employees. A Healthcare Institution Partner is open to healthcare and medical institutions who want to join the Holomedicine® Association. Healthcare Institute Partners (HIP) can nominate staff from their Institution to join the Association's Working Groups. The number of representatives who can join is dependent on the type of partnership you choose. In order for Healthcare Institutes to be certified as Holomedicine® Centre of Excellence, they are required to first join the Association as a HIP.

WHAT ARE THE BENEFITS OF BEING A HEALTHCARE INSTITUTE PARTNER?

Work on projects, research papers and international collaborations with expert clinicians from around the world

Access to the newest technologies developed by industry

Benefits for the healthcare institution – if criteria are fulfilled, institutions can achieve a Centre of Excellence status, showcasing and advancing their innovation leadership
